

MUHAMMAD MAULANA AGUNG

FULL-STACK DEVELOPER

Cianjur, Jawa Barat

081779234553 | muhammadmaulanaagung67@gmail.com | [linkedin](#) | [portofolio](#)

A Full-Stack Developer trainee with a background in Network Engineering and a strong interest in web application development. Currently expanding technical expertise through an intensive Full-Stack Developer Bootcamp, with hands-on experience in HTML, CSS, JavaScript, React.js, and Node.js. Has developed responsive and dynamic web applications through several academic and bootcamp projects, including movie catalog and movie database applications. Skilled in building reusable UI components, implementing state management and React Hooks, and creating responsive layouts across different devices. Possesses a strong foundation in problem-solving, analytical thinking, and attention to detail, with a strong motivation to continuously develop technical expertise in modern web technologies.

Project Experiences

Film Web - Harisenin Project Des, 2025 – Apr, 2026

Front-End Developer

- Developed a movie catalog interface using HTML, CSS, and JavaScript to display various film categories and details.
- Optimized the website's visual layout using CSS Flexbox to maintain design consistency and mobile responsiveness.

Back-End Developer

- Developing a dynamic movie database application using React.js to manage and display film content efficiently
- Implementing state management features to handle interactive elements and improve overall application performance.
- Creating modular and reusable UI components with React Hooks to maintain a clean and scalable code structure.

Todo List App - Harisenin Project Jan, 2026

Front-End Developer

- Developed a responsive and interactive To-Do List web application using Vanilla JavaScript, HTML5, and CSS3 with Bootstrap 5 framework.
- Implemented DOM Manipulation and Local Storage API to enable persistent data storage, ensuring tasks remain saved after page refreshes.
- Built core task management features, including task creation, status tracking (*Pending*, *Overdue*, *Completed*), priority filtering, and search functionality.
- Ensured mobile-first responsive design using CSS Media Queries and Bootstrap grid system, delivering seamless cross-device compatibility.

Personal Portfolio Website – Personal project Apr, 2026

- Designed and built a responsive personal portfolio website to showcase technical projects, skills, and professional experience.
- Implemented a mobile-first responsive layout, fixing cross-device navigation issues and handling overflow layouts seamlessly.
- Integrated Netlify Forms with custom JavaScript event handlers and SweetAlert2 to deliver seamless asynchronous contact form submissions without page reloads.
- Structured interactive UI components, including dynamic modals for skill details and optimized external resource handling.
- Deployed and maintained the website using Git version control and Netlify continuous deployment.

Education Level

SMKN 1 Cianjur - Cianjur, Jawa Barat Juli, 2022 - May, 2025

Network Engineering

- Relevant Courseworks: Fiber Optic Technologies, Data Communication, Network Infrastructure, and Basic Programming
- Vocational Competency: Specialized in Fiber Optic data transmission and signal frequency management. Possesses a solid understanding of basic programming and networking infrastructure, essential for building and deploying scalable web applications.

Courses, Training and Certifications

Harisenin.com - Jakarta, Indonesia Des, 2025 – Present

Full Stack Developer Bootcamp, 4.00/4.00.

- Key Activities: Developing responsive interfaces using React.js, implementing state management with Zustand, and integrating the frontend application with the backend API for CRUD operations.
- Courseworks: Proficient in end-to-end web application development (Full-Stack) using the JavaScript ecosystem. Skilled in building dynamic front-end interfaces with React.js and Next.js, as well as managing back-end systems, MySQL databases, and REST API integrations using Node.js and Express.
- Final Project: Building a movie application API featuring secure authentication, CRUD functionality, and efficient data management using Node.js, Express.js, MySQL, and Sequelize ORM.
- Certificate: Successfully completed a Full Stack JavaScript course and demonstrated practical experience in frontend and backend development, as well as API creation.

Skills

Technical skills: HTML, CSS, JavaScript, Bootstrap, Node.js, React.js, GIT, PHP, MySQL, REST API

Tools: Visual Studio Code, Git, GitHub, Postman, Claude, Gemini,

Soft skills: Problem Solving, Time Management, Orientation to Detail, Analytical Thinking and Teamwork, Fast learner, Adaptability

Languages: Indonesian (Native), English (Intermediate)
